

Introducing Atomi

BY ACE

English Curriculum

Advanced English Class

In junior high school, Atomi has an advanced English class that is conducted differently than normal classes. We use high level textbooks and hold many presentations that test our skills and knowledge. This class also has a separate test that makes up 70% of your English grade so you must perform well in order to stay up with this class.

Filipinos Online English Class

In junior high school, you have a lesson you take from teachers in Philippines once a week. In that lesson you mostly use your text book you use in normal class but the special part of that class is that you can have a free talk with your teacher. It's unique in that the lesson will be held entirely in English. Although it may be time challenging for you, chatting with your teacher will definitely enhance your English skills.

English Class With Native English Teachers (ALT)

The difference between online lesson and class held by ALT teacher is that we do more activities by using English. In Atomi, we have ALT teachers who come from Canada, England, and New Zealand so it is a good experience to communicate with teachers who come from different countries.

Recitation Contest

The recitation contest is a competition aimed at junior high school students and to test your English-speaking skills. Each grade is given a different script to present, and you can earn high scores by making the script unique to you. Additionally, participants who place in the top three can win various prizes and honourable certificates. While participation is optional, it is an invaluable experience for students to speak in front of a large audience.

Extra Curricular Activities

Japanese Culture

Learning about Japanese culture is one of the unique parts of Atomi. Here we can learn about tea ceremony, koto music and flower arrangement. Not only taking class but also, all three of them have opportunities to show your skills to people.

English Channel

The English Channel is an extracurricular class conducted by Native teachers. They are separated into 4 different levels: starter, basic, middle, and returnees so you take classes according to your English level. Moreover, you can communicate with students from different grades.

In-Class Activities

Table Manners

In their first year of high school, students attend a French table manners class at a prestigious hotel. By enjoying an authentic three-course meal, they are able to learn important social etiquette. In 2024, the second year of high school students had the opportunity to study Chinese table manners in Yokohama's Chinatown.

Career Exploration

During the pivotal years of high school, the school provides us with career education support programs to reflect on ourselves. As a starting point, we conduct a fieldwork called “**Career Interview**” in the third year of junior high school to research on occupations we are interested in. In high school, “**Career Exploration day**” is held immediately after the start of first year. Students are able to expand their views on the world by listening to lectures and stories of various people with different career paths. Through these experiences, students learn how to build a career and how to create a realistic plan for their future.

School Events

Science Exploration Trip

This is the trip you go to during first and second year of junior high school. Mainly you learn about nature and culture during this trip so that you can understand what you study in the science class by experiencing these trips. This trip is mainly focused on cooperation with friends and experience of enjoying nature. In the first year of junior high school, we go to Karuizawa to learn about agriculture. We harvest some vegetables and we even cook curry outside. In second grade, we go to Oze to learn about nature environment. We can see many plants and animals on our walk that we can't see in the middle of Tokyo.

This learning process leads to deep learning in SDGs School Excursion we go in the third grade of junior high school.

Sports Festival

The annual sports festival is a highly anticipated event that is held during the summer of term 1. The festival is organized into three teams: red, white, and blue. Each team is made up of students from various grades, fostering a spirit of teamwork across age boundaries. In addition to participating in various activities, the third year of junior high school students perform a traditional Atomi dance and the third year of high school students perform an original dance as an emotional goodbye to their youth.

Autumn

Self-Produce School Excursion

As the title says, second-year high school students produce their own travel plans. Each student starts with a question that correlates to their future career paths and choose between Nara, Osaka, and Hyogo as their destination to find solutions to their inquiries. By collaborating with peers, students are able to discover new sides of themselves to build a cohesive and optimum travel plan. Lastly, the entire grade gathers in Kyoto to enjoy the beautiful scenery and immerse themselves in the traditional Japanese atmosphere. After the excursion, students reflect on their individual trips and give a presentation on what they've learned throughout the journey.

SDGs School Excursion

This trip is for third-year junior high school students, which began in 2022. Students can choose one of three destinations—Hiroshima, the Kyushu region (Nagasaki & Kumamoto), or Okinawa—based on their interests related to the 17 SDGs. Over the course of the four-day trip, students explore various issues, focusing on topics such as war and peace, as well as social and environmental problems. Additionally, the program includes a homestay experience with local residents, allowing students to build meaningful connections with the community. The experiences gained during the trip provide students with an opportunity to reflect on their future careers and think of what kind of person they wish to become.

School Festival

School festival is a large scale event that happens annually. Students can showcase what they have been preparing to peers and families through performance and exhibition.

Others

Club activities

More than 80% of the students have joined club activities, with a total of 29 clubs—12 sports and 17 cultural—working together to achieve high goals. One of the greatest appeals of club activities in Atomi is that the facilities are well-equipped so students are able to exert their fullest energy into their activities.

Campus tour guide

In Atomi, we do tour guide to elementary school students and the person who guide them is Atomi students. They take a test in order to be a campus tour guide and they guide students and show Atomi's facilities and the unique part that they only know :)

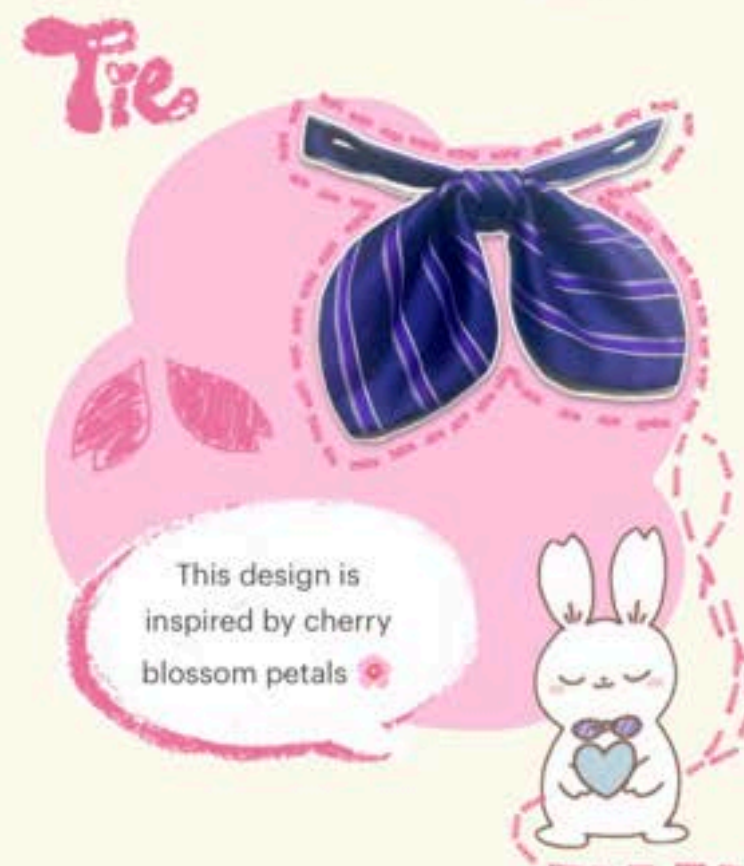

School uniform

We have various types of uniform that you can wear however you like!

Messages from ACE

(Nana Nishioka)

If you are passionate about learning English, you're in the right place! From fun classroom activities to speaking opportunities, there are multiple ways to practice and demonstrate your English abilities. Plus, Atomi offers a study abroad program, giving you the chance to experience English in real-life settings. I'm a returnee myself but I was able to participate and enjoy many English opportunities here! Please consider Atomi if you love English like us 🤝

(Lee Katsumata)

Atomi has opportunities to utilize your English skills so you can enhance your communication skills by following these activities.

I didn't have confidence in my English skills at first, but through studying abroad in Australia (term exchange program) and participating in ACE activities, I came to enjoy speaking English!

In this way, Atomi brings you multiple chances to improve your English!! Let's join Atomi and study English with us 🌸💕

(K.N)

In Atomi, there are many different ways to learn and keep the skills of English. Not just the class but also like our activities, we can use English in multiple ways so if you are interested in those things please check out Atomi 🙌💕💕
